

Benefits Data Consent Form

Formulary benefits data are maintained for Health Insurance Providers By organizations know as Pharmacy Benefits Managers, which are third party administrator of prescriptions drug programs, whose primary responsibilities are processing and paying Prescription drug claims. They also develop and maintain formularies, which are lists of dispensable drugs covered by a particular drug benefit plan.

By signing below, I give permission for Eddie Nassar M.D.,P.A. to access my pharmacy benefits data electronically through RxHub. This consent will enable Eddie Nassar M.D.P.A. to:

Determine the pharmacy benefits for a patient's Health Plan.

Check whether a prescribed medication with preference rank(In formulary) is under a patient's plan.

Display Therapeutic alternatives with preference rank within a drug class for non-formulary medications.

Determine if patient's health plan allows electronic prescribing to mail order pharmacies, and if so, prescribe to these pharmacies.

Download a historic list of all medications prescribed for a patient by any other provider.

In summary, we ask permission to obtain formulary information, and information about other prescriptions prescribed by other providers using RxHub.
